

GLONASSSoft vehicle monitoring system

The image shows a red truck with a white trailer driving on a multi-lane highway. The background features a vast, green rural landscape with fields and a clear sky. In the foreground, a computer monitor displays the GLONASSSoft vehicle monitoring system interface. The interface includes a map showing the truck's location in Krasnoyarsk, a list of tracked vehicles, and various data charts and reports.

Описание: Скорость, Остановка, Топливо, Заправка (Топливо), Стоп (Топливо), Температура

Main advantages :

Easy to use, intuitive system, constant updates

94 % of integrators admit the system to be the most convenient from all popular platforms

Stable work of all modules and high efficiency, quick reaction to the commands

Monthly
updates

Reduce of click
number

Intuitiveness
increase

Activity calendar for quick and
convenient way of doing reports

Support of all popular devices

Diagnostics system
of terminals and sensors

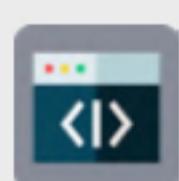

Favourable price policy and reliability

Standard functionality

Cost-free data storage for 1 year

Command sending onto the terminals

Support of exterior equipment with open protocols

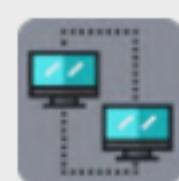

Convenient report samples

Mobile application for iOS and Android

Module «Technical maintenance»

Retransmission service (EGTS, NIS, Wialon IPS)

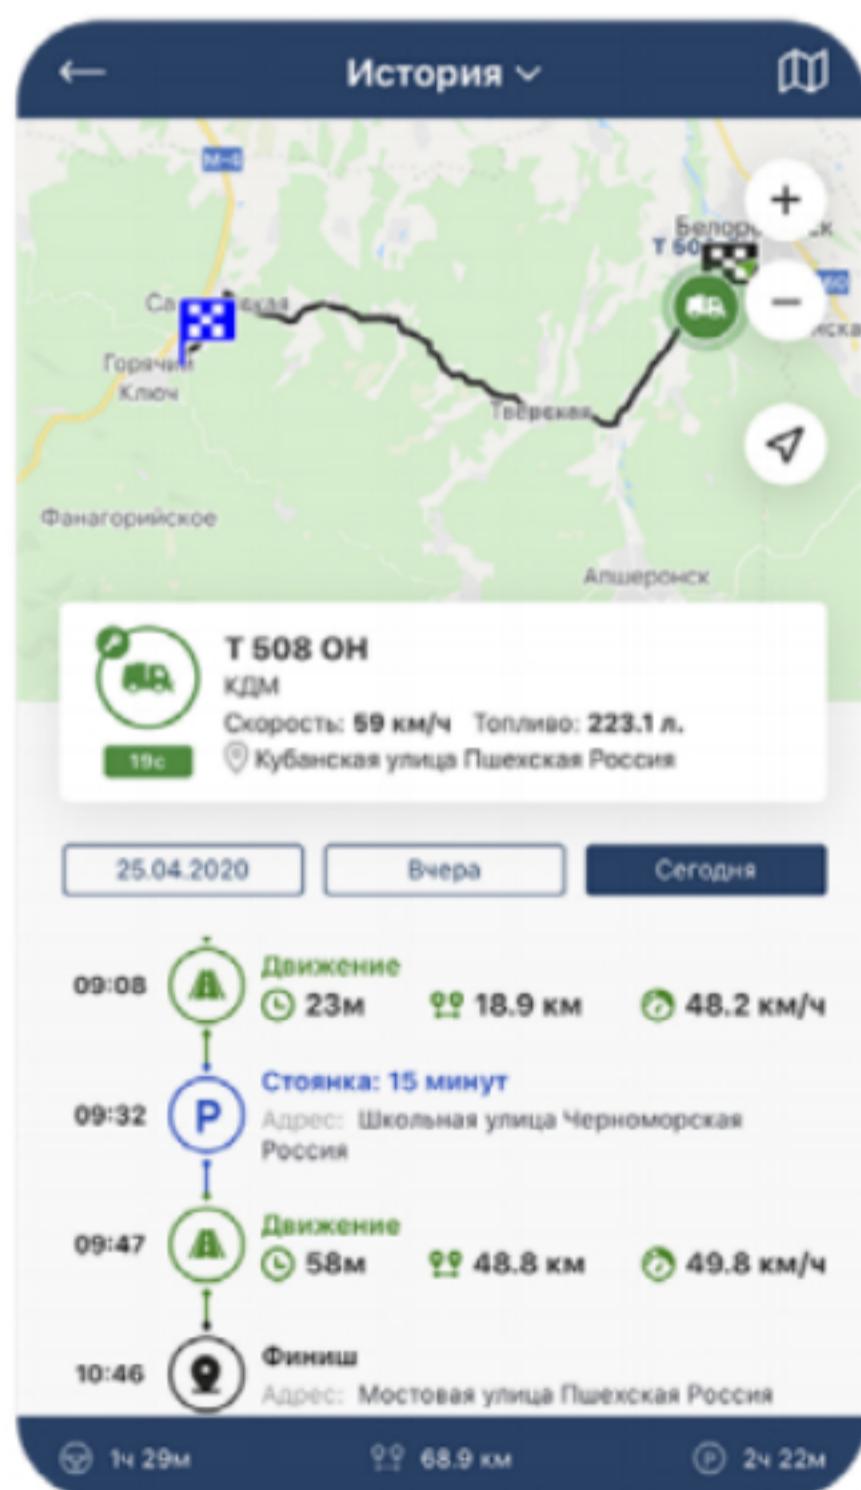

Regular updates

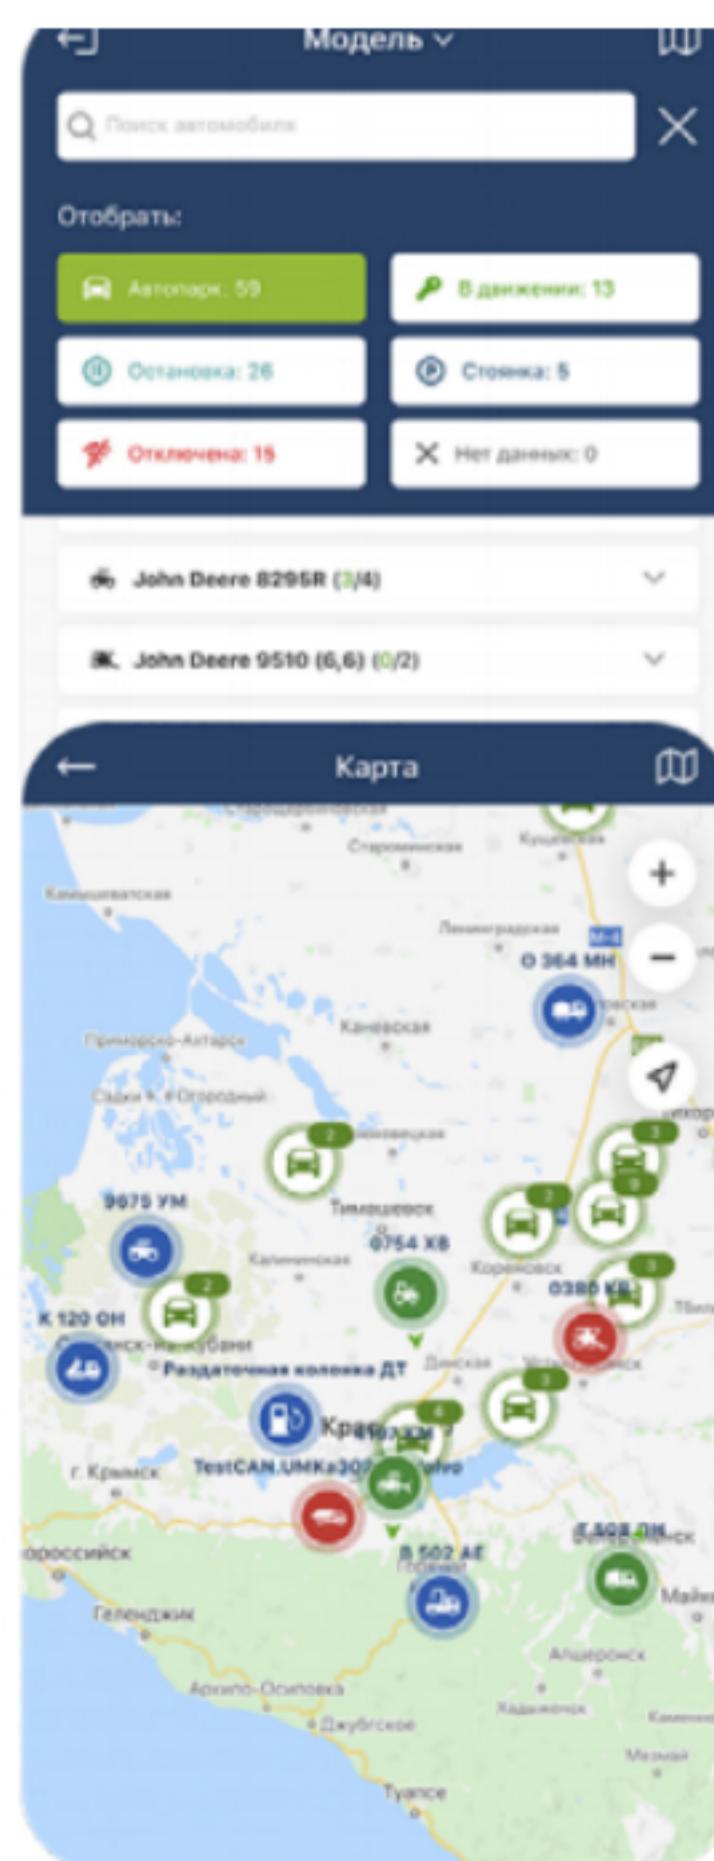

New advanced mobile application

Necessary functionality is also available on mobile phones via branded application for iOS and Android.
