NEW

UMKa315

A modern universal tracker that incorporates the main advantages of UMKa310, retains its compact size, RS-485, BLE interface and has a 250 mAh battery.

Advantages:

- Battery 250mAh;
- Impact-resistant housing of our own design, easy installation on ties;
- Optional - support for RS-485 interface for connecting up to 4 FLS;
- Controlling power modes using SMS commands;
- Possibility of connecting up to 3 FLS via BLE;
- Possibility of parallel sending of data to several servers;
- Management via DRC service;
- Housing protection degree - IP-54;
- MyLogic programming technology;
- Works as an iBeacon identification system;
- Lifetime warranty.
